### Soirée

[Swoor-áy]:

is a perfect accessory for any wine bottle and the perfect gift for your favorite wine enthusiast. By providing a chamber for wine to swirl and aerate, the Soirée enlivens wine and allows it to achieve its fullest taste and bouquet by adding the essential ingredient that every wine needs - oxygen.

Soirée was created in response to the need for effective yet simple wine aeration. The efficiency of the Soirée lies in its glass aeration chamber, which conveniently fits directly into any wine bottle. Upon pouring, the wine swirls into the chamber and is agitated by the Soirée's uniquely designed dimples (patent pending). This process optimally infuses the wine with oxygen as it is served into the glass. Whether you're using an entire bottle of wine for guests or pouring a single glass for yourself, the Soirée decants any portion of wine, as you pour it, and may be used over and over.

Going beyond functionality, Soirée also brings beautiful form to every pour. Impress guests with its neat pour and elegant, light-reflecting swirl. Soirée is ready to use straight from the box and comes with an elegant stand that keeps it safe when not in use and doubles as a drying rack.

We welcome orders from the public, retailers, restaurants, corporations, and distributors in the USA & internationally. Soirée can be customized with a logo, your event title, or company's name applied directly to the glass; only available for large orders.
